CONCRIA™ MAKES POLISHED CONCRETE

Affordable Floor for Every Project

Polished concrete has become the ultimate flooring material for big box retailers, warehouses, convention halls and production facilities around the world. Thanks to awarded Concria system, concrete floors can be polished extremely fast and cost-effectively. Concria makes concrete more long-lasting and affordable flooring than for example epoxy coatings or tile floors.

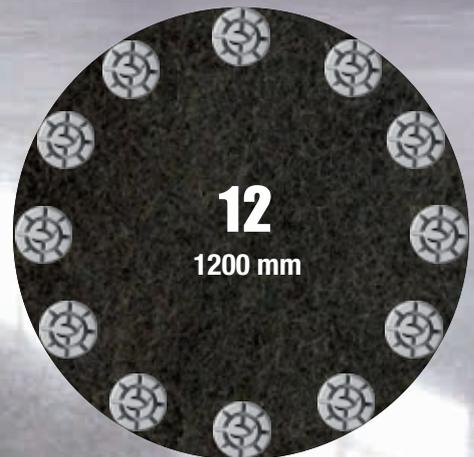

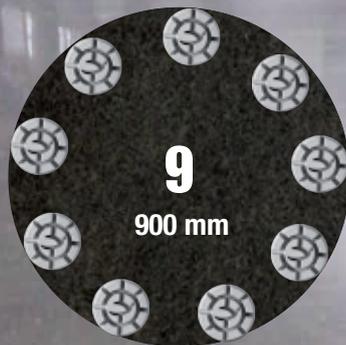

“Construction schedules are very tight today, often not leaving enough time for traditional grinding and polishing. Concria™ TrowelPolish allows us produce over 1,000sqm of polished concrete in a working day”

Concria™ TrowelPolish customer

TRANSFORM YOUR POWER TROWEL INTO A GRINDING AND POLISHING MACHINE IN JUST 5 MINUTES

– without any tooling or changes to your Power Trowel

Size of Concria™ Mounting pad and Number of Concria™ Diamond Discs

ALL YOU NEED:

BENEFITS FOR FLOOR CONTRACTORS

- Win more contracts by offering polished concrete at a fraction of the cost of traditional concrete grinding and polishing methods
- Expand your business into the concrete polishing market with minimal investment
- Get more satisfied customers by creating durable floors that are glossy, 100% dust-free and easy to clean
- You don't need to hire a subcontractor or invest in grinding machine
- Use Concra system to remove curing agents, bond breakers, and tire marks from the concrete surface without interrupting the construction schedule
- Rejuvenate an old floor

Make more profit by taking floors to the next level – with Concra discs and your existing machines!

Concra™ TrowelPolish customers:

Mercedes-Benz, Gazprom, Coca-Cola, Leroy Merlin, P&G, Bimbo, BRP, Carrefour, Rosauers Supermarkets, K-Rauta

In 2015 alone, more than 500,000sqm is grinded and polished with Concra™ TrowelPolish. And we have just started.
